I. Overview.

With Advanced Group plugin, website owner can set limitations for each vendor group. In example all vendor in Bronze group can only add 20 products, does not allow to manage categories, does not allow to customize his pages...

II. Set Permission For Each Group

From admin cpanel edit a vendor group (go to menu Vendors -> Manage Groups). After you install the Advanced Group plugin you will see new tab "Advanced Options".

The screenshot displays the 'Edit Group' configuration page in the VnEcoms admin panel. At the top, a navigation bar contains links for Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Vendors, Reports, System, and a help link. The sidebar on the left shows 'Group Information' with tabs for 'Main' and 'Advanced Options'. The main content area is titled 'Edit Group '2'' and features several action buttons: Back, Reset, Delete Group, Save Group, and Save And Continue Edit. Below these are four sections for feature permissions: CMS (Enable CMS Feature), Message (Enable Message Feature), Category (Enable Category Feature), and Product (Max products). Each feature has a dropdown menu set to 'Yes'. The 'Max products' field is currently empty, with a tooltip indicating it is the 'Maximum number of product that you allow this vendor group to add'.

Here you can set permission vendor group. With standard package you will have only Product permission. If you install plugins you will get other permission on this tab.

III. Support.

If you need support or have questions directly related to Marketplace extension, please use our Online Message Form to contact our support team or send us an email at: support@vnecoms.com.

Best Regards,
VnEcoms Team
